

## SUMMARY

---

Full-time developer since 2008. In the field of IT since 2001. Deep knowledge of Java, Ruby and Elixir. Drawn to test driven development and fan of bugfixing. Constantly experimenting with new technologies. Loves to travel and has worked remotely from several places in Europe and the US. Website at [leif.io](http://leif.io), tech blog at [blog.leif.io](http://blog.leif.io)

## CODE

---

**Formulon** | [formulon.io](http://formulon.io)

Interface for quickly developing Salesforce Formulas

**Excellent** | [github.com/leifg/excellent](https://github.com/leifg/excellent)

An Elixir library to parse Microsoft Excel Files. Solo Project.

**Bulkforce** | [github.com/propertybase/bulkforce](https://github.com/propertybase/bulkforce)

Ruby wrapper for the Salesforce Bulk API. Solo Project.

**Quito** | [github.com/Betahackers/quito-backend](https://github.com/Betahackers/quito-backend)

Backend for an online city guide for Barcelona. Result of a Hackathon of Betahaus Barcelona. Mainly in charge of integrating the backend with Foursquare.

**HN Vanity** | [www.hnvanity.com](http://www.hnvanity.com)

CQRS application to gather basic statistics about Hacker News post. Built using Elixir, Phoenix and Commanded.

**Release Ping** | [www.releaseping.com](http://www.releaseping.com)

Another CQRS application with an ELM frontend to show the latest version of the most popular programming languages.

**Foodpic** | [github.com/TheSurfOffice/Foodpic](https://github.com/TheSurfOffice/Foodpic)

iPhone app to connect with beacons for a food menu. First project with Swift. Good opportunity to acquire some knowledge of the Cocoa Touch framework.
